

Python in Containers Course Materials

 

 

 

 

Links:

<https://github.com/pythonincontainers/entrypoint-cmd>

Commands:

Dockerfile.simple:

```
$ docker build -t simple -f Dockerfile.simple .

$ docker inspect simple

$ docker run --rm simple

$ docker inspect python

$ git clone https://github.com/pythonincontainers/entrypoint-cmd

$ cd entrypoint-cmd

$ docker build -t entry -f Dockerfile.entry .

$ docker run --rm entry

$ docker build -t parent -f Dockerfile.parent .

$ docker build -t child -f Dockerfile.child

$ docker inspect -f "ENTRYPOINT={{.Config.Entrypoint}} CMD={{
{.Config.Cmd}}}" child

$ docker run --rm child

$ docker run --rm child five six seven

$ docker run --rm --entrypoint python3 child args.py hello world

$ docker run -it --rm --entrypoint="" child /bin/sh
```

Python in Containers Course Materials

```
$ docker build -t shell -f Dockerfile.shell .

$ docker inspect -f "ENTRYPOINT={{.Config.Entrypoint}} CMD={{.Config.Cmd}}" shell

$ docker run --rm shell

$ docker run --rm shell

$ docker run --rm shell four five

$ docker build -t signals -f Dockerfile.signals .

$ docker run -it --rm --name signals signals

$ docker stop signals

$ docker kill -s SIGHUP signals

$ docker kill -s SIGINT signals

$ docker kill -s SIGUSR1 signals

$ docker kill signals

$ docker kill -s SIGUSR1 signals

$ docker stop signals
```
